

# CUMIS – Technicost eroServe LOS announcement

## 20 October 2011 Update

### Attention:

Manitoba credit unions using the Technicost LOS.

### Product Launch:

Please be advised that the latest version of the Technicost eroServe LOS is now available for installation with your credit union. As you are aware, eroServe is fully integrated with the iCLIC web services at CUMIS. This close integration provides a more efficient and effective delivery of loans to the credit union member.

Over the past few months, CUMIS has been working with Technicost to integrate the latest version of eroServe as part of the CUMIS Creditor Enhancement Program. Testing of this integration is now complete and we are now able to extend the new integration to the Manitoba eroServe LOS credit unions. We appreciate your patience and understanding as we work with you to introduce this system upgrade.

### Next Steps:

The implementation project team will be in touch with you to schedule an implementation kick-off meeting.

### Questions

If you have any questions in the interim please contact:

Brad George  
Sr. Project Manager  
Customer Connectivity Centre
